

GLEN OSMOND HOME

ELEVATE™ ALUMINIUM SYSTEMS ALLOW FOR SPECTACULAR VIEWS OVER ADELAIDE IN THIS ELEVATED HOME.

This amazing Glen Osmond home feels as though it is in the treetops, as it looks over the entirety of Adelaide from the living spaces. The clients wanted to create a home that maximised the use of their fortunate block.

The brief from the clients to architect Marco Spinelli of Architects Ink was to create a view in every room. Opening the house to the nature that surrounded this home was the most important factor for the architects to consider. The clients also required a home that was quite sustainable and didn't cost a lot to run.

The home has been designed by taking into account the clients, their needs and their lifestyle. The house has been created utilising two separate living spaces. Downstairs is dedicated to the couple's sons who have their own bedrooms and study area, bathroom and lounge. Upstairs is where the indoor living meets the outside entertainment area, divided by a large sliding door. This is the focal point of the home, where the clients can bring their extended family together and create an open space for them to interact.

AWS | PROJECT FEATURE

To ensure all views were maximised throughout the home, as per the clients' brief, a high quality window and door system was required.

York Glass & Aluminium completed this project using the Elevate™ Aluminium Systems range of aluminium windows and doors.

Elevate™ Series 50 sliding doors were used to create the main indoor/outdoor living space. The multi-stacking doors fold back flush with each other to open up the focal living spaces in this project.

Louvres windows were used in bedrooms and living spaces to create cross ventilation throughout the home.

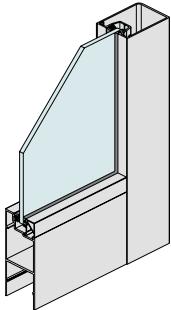

The strategic use of glazing in this home allows the clients' brief of maximising views to be met. There is a view from every room in the house, allowing the family to embrace their surrounds from the comfort of their home.
