

MERCY CENTRE

DLG ALUMINIUM & GLAZING USE
ELEVATE™ WINDOWS AND DOORS
TO WELCOME LIGHT AND VIEWS OF
THE OUTDOORS INTO THE AGED
CARE CENTRE.

This inspirational Aged Care Facility is located in Albury, NSW, and has been designed by JWP Architects. The building is a 60 bed nursing home, made up of bedrooms, various sitting rooms, verandah space and television rooms. The activity, lounge and dining rooms have been designed to take in the view of the garden.

The complex is located on a hill in Albury and has a large garden area and views across parts of town, to which all the common rooms open up to ensure light flows throughout the complex.

It was important to have large floor to ceiling double glazed fixed and sliding glass doors in these communal living spaces – to meet the brief of allowing light and views of the outdoors into the facility. The windows and doors were double glazed in these areas to ensure energy efficiency whilst not compromising on size.

For the bedrooms, it was important to also allow light in, but more importantly ease of operation and good sound proofing properties were required for the glazing. Series 456 commercial awning windows and Series 52 sliding

doors were used throughout the bedrooms in the complex due to their ease of operation for this application as well as having good acoustic performance.

In terms of glazing, this project was complex. Local manufacturer DLG Aluminium & Glazing worked closely with builders to ensure the architects' design brief could be met. Not only did the exterior of the structure use a different glass colour, the project also required different colours, shapes and sizes of aluminium.

The large façade blocks of glass were all made to measure on the site due to the complexity of the angles. The Elevate™ window and door system allowed JWP's design to come to life, through the ability to custom design window and door solutions.

This project has won a Master Builders Association Award for 'Best Commercial project from \$5 to \$10 million'.

■ ELEVATE™ SERIES 52 COMMERCIAL SLIDING DOOR

- × Series 52 hinged doors are 50mm thick for added strength.
- × Series 52 sliding doors have removable snap-on glazing beads on horizontals and verticals (both sides).
- × Stile to rail joint is securely fixed with custom spigot assembly. Accepts many of the Series 606
- FrontGLAZE™ frame accessories including doors, sub-frames and thresholds.
- × Sliding door glass can be blocked and fitted with adjustable setting block.
- × Series 52 sliding doors will accept glass up to 24mm thick.
- × Can be security glazed with captive
- external glazing wedge.
- × Lock stile wide enough to accept most lock types.
- × Can be fitted with Centor SIE Eco Screen.
- × Horizontal rails can be fitted with square or splayed glazing beads.

DLG Aluminium & Glazing work closely with architects to achieve the ideal glazing solution for the project balancing the requirements for energy efficiency, acoustic performance, aesthetics and bushfire regulation compliance. The team at DLG is dedicated to providing customers with the personal service and technical excellence they have come to expect - as well as good value for money. The DLG showroom offers an extensive display of Vantage and Elevate™ systems and provides the ideal environment to make informed decisions about the windows and doors for your project.

2D & 3D CAD Files Available | Download from specifyaws.com.au to use in your projects.
