

COASTAL LIVING

**ARCHITECTURAL ALUMINIUM
UTILISE ELEVATE™ SYSTEMS TO
ENGAGE WITH MAGNIFICENT
BEACH VIEWS**

This spectacular architecturally designed project is located on the south coast of New South Wales. Designed as a pair of modern beach houses, these homes occupy a greenfield site overlooking the beautiful Gerringong Beach.

Architects Smart Design Studio designed the homes to encompass the surrounds of the site.

The form of the building is simple- a timber driftwood box with a white roof floating overhead.

The simplicity of the exterior was purposeful, to ensure the design did not detract from the magnificent north view of the mountains and south view of the ocean.

The house positioning was well thought out by architects to make the most of the space. They located the living room, kitchenette, and master bedroom upstairs, where the views are best. Downstairs, the main kitchen, dining room, family room, and bedrooms open up to the north, and westward, to the mountains.

A durable, aesthetically pleasing glazing system was required for this project to ensure views were maximised. Architectural Aluminium provided the aluminium windows and doors for this extensive project.

The Elevate™ Aluminium Systems range of windows and doors were utilised due to their durability, reliability and renowned longevity. Aluminium windows and doors coupled with 316 grade stainless steel hardware provided the homes exceptional corrosion resistance for their coastal application.

Elevate™ Series 704 sliding doors were used in living spaces, due to their ability to be manufactured in larger sizes to maximise views. The sliding doors also allow for a seamless transaction between indoor / outdoor spaces.

Full height ClearVENT™ windows were utilised in bedrooms to maximise views by minimising frame sizes.

ELEVATE™ ALUMINIUM SYSTEMS SERIES 704 SLIDING DOOR

- × Tested for compliance with the relevant Australian Standards and achieved a water resistance of 1000Pa. This makes the product suitable for most applications including multistorey apartments.
- × Low air infiltration makes the product suitable for air conditioned buildings. is ideal for commercial and high-end residential applications where minimising heat or cold transfer is desired.
- × The extra strong sashes allow large sash windows to be fabricated for high wind load areas.
- × Splayed or square glazing beads available.
- × 102mm frames, mullion and transom have a soft 2mm internal radius.
- × Awning sashes can be fitted with cam handles, manual chain winders or concealed electric winders. The winder options suit fixed flyscreen installation.

Architectural Aluminium are an aluminium window and door supplier, providing windows and doors to the architectural market. We offer our clients high quality, durable aluminium window and doors for both residential and commercial applications. Architectural Aluminium pride themselves on providing custom solutions for their clients and manufacturing product to the highest standards.
