

THOMPSON ST

■ CORNERING THE ART OF BEAUTY IN MOSMAN

When the owners purchased this beautiful home on a corner block in leafy Mosman, the house hadn't been given a facelift for decades.

It was time for a much-needed refresh, inside and out. One of the top priorities was modifying the windows and doors to open the home.

To create a sense of connection between the interior and exterior spaces, the team at Orion Aluminium was consulted and Vantage® 618 MAGNUM™ sliding doors were chosen for the task. The doors span floor-to-ceiling

where possible to maximise the view and natural light. The flush threshold all the way around makes this connection feel seamless.

A complex corner configuration with cavity sliding doors gives the owners greater flexibility and space within the home. At a whopping 2.7 metres high, they create a stunning focal point.

Elevate™ 462 Awning and 466 Sliding Windows were chosen to meet the designer's preference for square edge forms and continuous sightlines.

AWS | PROJECT FEATURE

To complete this modern facelift, Zeus matt black finish was selected for the aluminium windows and doors.

Because the windows and doors were so expansive, thermal glass was used for added insulation to help keep the home cooler in summer and warmer in winter.

Additionally, remote-controlled highlight awning windows are easily opened for natural air flow and circulation – especially during the colder months when doors are normally closed.

All windows and doors are complemented with ICON™ hardware – chosen for its durability and style.

The result is a modern oasis of privacy and beauty that will delight its owners for years to come.
