For Windows & Doors

The finishing touches

Hardware solutions by AWS.

Quality
Reliable
Exclusive
Premium
Functional

Beautiful hardware combines form and function to transform a house into a home. It's a defining feature reflecting who you are.

We offer three unique and stylish suites of purpose-designed hardware to complement the performance and styling of Vantage® and Elevate™ window and door systems.

The right solution is the one that's right for you, and we've been getting it right in Australian homes and commercial applications for more than 25 years.

Our Ranges

Each of our hardware ranges are uniquely styled to offer you a variety of options for your windows and doors.

Form & Function

Crafted to complement the clean, modern design of Vantage® Designer Series windows and doors, the ANDO™ range brings a clean and refined look to your home or commercial project.

ANDO™ is a comprehensive range of hardware that is easily tailored to your needs. It is available in a variety of finishes including colour matched powder coats.

Strength & Integrity

ICON™ is a range of 316-grade stainless steel hardware for aluminium windows and doors. It offers superior weathering performance and outstanding durability, making it suitable for all environments.

Developed for use with our high-performance window and door systems, ICON™ incorporates a square-edged, linear look. It's the perfect finishing touch to complement our Designer or Architectural Series windows and doors.

Contemporary Style

MIRO™ hardware offers a textured, matt black, white or silver finish, ergonomic operation for greater accessibility and beautiful curved aesthetics.

Purpose designed for use in harsh environments, the cast aluminium body incorporates our exclusive Enduratec™ finishing technology, tested to deliver 10 times the corrosion resistance of traditional powder coat finishes.

Compatible with Architectural, Residential and Designer Series windows and doors, MIRO™ is an appealing choice for any application.

Choosing the right hardware for your project.

When thinking about hardware selection for your home it is important to consider that the locks and handles you choose will not only provide security but also represent the element of your windows and doors you will interact with most regularly. There are a number of important considerations when selecting hardware for your windows and doors.

Accessibility & Operation

Should the handle or lever be compliant with disability standards to ensure the long-term livability of your home?

If so, AWS offers a number of hardware options which make access for individuals with reduced dexterity easier and a number of options which comply with the requirements for disability access as outlined in AS1428.1-2021 Design for Access.

AS1428.1-2021 Compliant

If AS1428.1-2021 compliance is a priority, look for hardware options marked with this symbol.

Accessibility Focussed

If compliance isn't essential but enhanced accessibility features are important, look for hardware options marked with this symbol.

Colour Matched Finish

Hardware can be a defining statement in your home and the ability to select from a range of colours to complement your internal colour scheme is important.

The ANDO™ range of hardware allows for colour matched options.

Colour Matched

If the ability to colour match your hardware is a priority, choose from hardware items with this symbol.

Bushfire Prone Areas

AWS offers a wide range of window and door systems tested for use in BAL-40 applications. Not all our hardware has been through the testing process.

BAL-40 Tested

If you are building in a BAL-40 application where you wish to use a tested window or door system, select from hardware with this symbol.

Harsh Environments & Coastal Applications

Coastal applications are renowned for having harsh environmental conditions which can impact the long-term integrity of your hardware. AWS offers two hardware ranges which are well suited for use in coastal applications, though neither will be immune to the impacts of this harsh environmental condition.

Enduratec™ Finish Technology

Our unique range of MIRO™ hardware with Enduratec™ Finish Technology is a great solution for areas subjected to harsh environmental conditions, such as coastal applications but where a cost effective and low maintenance solution is preferred.

Hardware coated with Enduratec™ Finish Technology performs up to 10 times better than standard powder coat hardware when tested in a neutral salt bath for corrosion resistance.

The unique Enduratec™ Finish incorporates a stylish matt appearance and requires very little maintenance to keep it looking great. Hardware should be wiped over with a damp cloth or mild soapy water every 3–6 months.

We are so confident about the performance of Enduratec™ coated hardware we are prepared to warrant these items against finish defects even in applications less than 5km from the coast.

Enduratec™ Finish Technology

If you are looking for hardware items available with Enduratec™ Finish Technology, select from items marked with this symbol.

Stainless Steel Hardware

Stainless steel hardware is our premium offering for use in harsh environmental conditions. Made from 316-grade stainless steel, ICON™ hardware will provide excellent longevity and performance.

Stainless steel is resistant to rust but not immune to it. Stainless steel will rust, commonly identified by the discolouration you might see on stainless steel hardware. This is referred to as tea staining.

Tea staining is discolouration of the surface of stainless steel by corrosion. It is a cosmetic issue that does not affect the structural integrity or the lifetime of the material. Tea staining occurs most commonly within about five kilometres of the surf and becomes progressively worse closer to the marine source.

To minimise the risk of tea staining occurring, hardware must be kept clean and free from contaminants. Monthly cleaning is recommended when living by the coast.

Stainless Steel

If you are seeking a premium solution for a coastal or harsh environment application, select hardware items marked with this symbol.

Single Point Sliding Door Lock

Surface-mounted to the door with an integrated single point locking mechanism, this strong and bold handle delivers modern design and clean lines.

Suitable for use with:

- 541 Residential Sliding Door
- 542 Residential Stacking Sliding Door
- 758 High Performance Sliding Door
- 759 ComfortEDGE™ Sliding Door
- 618 MAGNUM™ Sliding Door
- 442 Commercial Stacking Sliding Door
- 642 Commercial Stacking Sliding Door
- 471 Apartment Sliding Door
- 702 SlideMASTER™ Sliding Door (External Sliding)
- 704 SlideMASTER™ Sliding Door (Internal Sliding)

Height 216mm

Manual Chainwinder

The ANDO™ Manual Chainwinder is designed to suit Vantage® residential awning window systems and Elevate™ commercial awning window systems.

Incorporating a corrosion resistant Polesium™ body and adjustable 316-grade stainless steel chain, the ANDO™ Manual Chainwinder delivers a reliable and stylish solution which can be colour matched to the custom powder coat finish of your new windows.

The indicator allows you to see whether the winder is locked or unlocked at a glance.

Integrated within the body is a Safe4Kids™ restriction option that limits how wide the window can open to minimise the risk of falls.

Suitable for use with:

- 516** Residential Awning Window
- 517** Residential Awning Window
- 756** High Performance Awning Window
- 755** ComfortEDGE™ Awning Window
- 616** MAGNUM™ Awning Window

Sliding Door Handle

This handle makes a real statement. Its square form offers a firm yet comfortable grip and is ideal for larger sliding door panels in residential and commercial applications.

Manufactured from 316-grade stainless steel, this handle is ideal for use in harsh environmental applications and high traffic areas.

Available in two lengths: 325mm and 630mm.

Suitable for use with:

- 758 High Performance Sliding Door
- 759 ComfortEDGE™ Sliding Door
- 618 MAGNUM™ Sliding Door
- 702 SlideMASTER™ Sliding Door (External Sliding)
- 704 SlideMASTER™ Sliding Door (Internal Sliding)
- 704R SlideMASTER™ Sliding Door (Recessed)
- 704B SlideMASTER™ Sliding Door (Bottom Rolling)
- 704T SlideMASTER™ Sliding Door (Top Hung)
- 731 Thermally Broken Sliding Door
- 852S Thermally Broken Sliding Door

Depth 52mm
Part 93178

Height 630mm
Width 60mm
Depth 52mm
Part 93230

Optional: Thumb Turn. Offers a quick and easy locking solution, providing instant security without compromising safety. Locks from the inside, no need to search for key to unlock, simply rotate.

Part 93539

Hinged Door Lock

A clean and compact hinged door handle available in:

- 2-point lock – single locking
Part 93458
- 4-point lock – multi locking
Part 93470
- lever compression locking

The 4-point lever compression option activates additional locking rods at the top and bottom of the door.

This mechanism allows door panels to seal tightly and securely, increasing airtightness and improving energy efficiency.

The grip has a gently radiused front face and a curved back for a comfortable hand-hold.

The ICON™ Hinged Door Lock is highly durable and tested for use with large residential and commercial hinged door applications.

Suitable for use with:

548	High Performance Bi-fold Door	730	Thermally Broken Bi-fold Door
549	Hinged Entry Door	831	Thermally Broken Bi-fold Door (Top Hung)
50	Commercial Door (Single Beaded)	832	Thermally Broken Bi-fold Door (Bottom Rolling)

Width 25mm

Depth 16.5mm

Key Lock 93199

Non Keyed 93198

Casement Latch

Designed to suit residential awnings and casement windows, the main features of this latch are its bold square edges and radiused styling.

The 316-grade stainless steel makes it a classy and superior quality selection for use in coastal locations.

Suitable for use with:

- 516 Residential Awning/Casement Window
- 517 Residential Awning/Casement Window
- 616 MAGNUM™ Awning/Casement Window
- 456 Commercial Awning/Casement Window
- 466 Architectural Awning/Casement Window
- 726 Thermally Broken Awning/Casement Window

Twin Chainwinder

The MIRO™ Twin Chainwinder delivers a reliable and durable solution for even our largest awning window systems. The wider span allows greater flexibility in awning window design.

Like the MIRO™ Single Chainwinder, it incorporates Enduratedec™ technology to maximise durability and capability in coastal applications and other harsh environmental conditions.

Available in black, white and silver.

Suitable for use with:

- 516 Residential Awning Window
- 517 Residential Awning Window
- 756 High Performance Awning Window
- 755 ComfortEDGE™ Awning Window
- 616 MAGNUM™ Awning Window
- 456 Commercial Awning Window
- 665 Commercial Awning Window
- 466 Architectural Awning Window
- 726 Thermally Broken Awning Window

- Height 34.5mm
- Width 499.5mm
- Depth 48mm
- Part 93118

Accessibility Focused

Optional Special Access Lever (SAL) handle available to improve operability for those with reduced dexterity and to comply with AS1428:2021 Section 13.5 (Disability Access) and Livable Housing Guidelines.

Part 93123

MIRO™ HARDWARE COLOUR RANGE 65

Additional Hardware Options

Truth™ Awning Winder

Truth™ compact awning scissor winders are perfect for large awning windows. Tried and tested, Truth™ winders are strong and won't budge under wind load.

Available in a selected range of colours, off-white, black and silver.

Suitable for use with:

- 616 MAGNUM™ Awning/Casement Window
- 467 Architectural Awning/Casement Window
- 468 Truth™ Awning Window/Casement
- 668 Truth™ Awning Window/Casement
- 726 Thermally Broken Awning/Casement Window

Winder (pictured)
Part 93781

- Height 34mm
- Width 135mm
- Depth 40mm

Winder (keyed)
Part 93529

- Height 34mm
- Width 170mm
- Depth 37mm

Key locking version also available.

Truth™ Casement Winder

The Truth™ Casement Winder is a compact and stylish scissor winder ideal for large casement windows and offers 90-degree opening. This winder has been rigorously tested and won't open or close under wind load.

Available in off-white, black and silver.

Suitable for use with:

- 616 MAGNUM™ Awning/Casement Window
- 467 Architectural Awning/Casement Window
- 468 Truth™ Awning Window/Casement
- 668 Truth™ Awning Window/Casement
- 726 Thermally Broken Awning/Casement Window

- Height 34mm
- Width 170mm
- Depth 37mm

RH Part 93784

LH Part 93783

Key locking version also available.

Meeting Stile Mortice Lock

Designed exclusively for use with the Elevate™ range of SlideMASTER™ flush finish doors, the Meeting Stile Mortice Lock integrates neatly into a central panel to be fully concealed for maximum glass sight lines.

The simple operating method provides ease of use and multi-point locking for excellent security. Available in a range of powder coat finishes to ensure the lock can be colour matched for a truly discreet appearance.

Exclusively used with:

- 758 High Performance Sliding Door
- 759 ComfortEDGE™ Sliding Door
- 704FBR SlideMASTER™ Sliding Door (Flush Bottom Rolling)
- 704FTH SlideMASTER™ Sliding Door (Flush Top Hung)

Height 250mm
Width 33mm
Depth 6.5mm
Part 93796

Flush Stile Pull Handle

Architecturally inspired, the Flush Stile Pull Handle is designed exclusively for use with the Elevate range of SlideMASTER™ flush finish doors.

The colour matched, aluminium pull handle provides a strong D-Pull grip which nests neatly around the panel for a minimal and integrated appearance.

Exclusively used with:

- 704FBR** SlideMASTER™ Sliding Door (Flush Bottom Rolling)
- 704FTH** SlideMASTER™ Sliding Door (Flush Top Hung)

Height 300mm
Width 60.5mm
Depth 40mm
Part 93799

Lift Slide Handle

Designed exclusively for use with the Elevate™ SlideMASTER™ Lift Slide Door, the handle utilises a 180° operating arc to activate lift mechanisms within the sliding door panel for effortless operation. Reverse rotation compresses the panel against the door seals for security and airtightness.

The clean, sharp styling of the handle allows it to integrate with the ICON™ hardware range when coordinating the hardware selection for your home.

Available in black, white and brushed silver.

Exclusively used with:

704LS SlideMASTER™ Sliding Door (Lift Slide)

Handle	253mm
Height	160mm
Width	34mm
Depth	71mm

Performance Side Latch

Used in conjunction with the single or twin manual chainwinders, performance latches add additional locking points for awning windows.

They may be recommended by your fabricator for applications subjected to high wind loads or in situations where awning windows are wide and require additional locking points to provide security and integrity.

Suitable for use with:

- | | | | |
|-----|-----------------------------------|-----|----------------------------------|
| 516 | Residential Awning Window (50mm) | 665 | Commercial Awning Window |
| 517 | Residential Awning Window (102mm) | 466 | Architectural Awning Window |
| 756 | High Performance Awning Window | 726 | Thermally Broken Casement Window |
| 616 | MAGNUM™ Awning Window | 804 | Thermally Broken Casement Window |
| 456 | Commercial Awning Window | 824 | Thermally Broken Casement Window |

Height 157.5mm
Width 32mm
Depth 16mm

NOTE The finishes displayed on this page are a guide only and may not be actual representations of the actual finish. For powder coat samples, you can order samples from the colour page on the Vantage or Elevate website. Your local Vantage and Elevate supplier may also have samples by request. For custom powder coat requests, see your local fabricator for more information.

Care & Maintenance

Powder Coated Hardware

Like any other painted surface, powder coated hardware performs at its best when it is properly cared for. Keeping the surface free from pollutants and environmental contaminants will give you the maximum benefit and long-lasting performance from your powder coated surface. This is particularly important in harsh locations such as beachfronts, severe marine environments or areas of high industrial pollution.

Recommended cleaning

Gentle cleaning with a soft brush and mild detergent, followed by a fresh water rinse, will maintain the long-term performance of your powder coated products. In rural or normal urban environments, cleaning should occur every six (6) months.

In particularly harsh locations such as beachfronts, severe marine environments or areas of high industrial pollution, cleaning should occur every three (3) months.

Do not use strong solvents, abrasive cleaning products or any product recommended for thinning paints.

If you need to remove splashed paint, sealants or mastics from your powder coated products, use white spirits, carry out cleaning in shade and during cooler temperatures using a soft cloth and gentle wiping only.

We recommend that prior to using any cleaning agent on your hardware, you test a small non-visible area of your powder coated product to ensure that no visual colour change or damage will occur.

Stainless Steel Hardware

Stainless steels are very resistant to rust, however this does not mean that they are immune to it. Stainless steel will rust, and must be kept clean and free from contaminants. Frequent cleaning is a requirement. Stainless steel will develop discolouration, rust spots, and corrosion brought about by environmental and installation conditions.

Environments with exposure to the following substances should be avoided:

- Chlorine based (bleach) products and cleaners.
- Hydrochloric acid (commonly used for tile and concrete cleaning).
- Cement dust.
- Soap concentrates.
- Water with high iron content (i.e. bore water).

Removing tea staining & marks

One of the advantages of stainless steel hardware is that any rust spots can be easily removed and generally the product will return to its “new” state with appropriate cleaning. Most discolouration can be removed with a mildly abrasive cleaner (Ajax, Jif, Brasso etc.). Heavier corrosion and rust can be removed using a Scotch-Brite™ pad or stainless steel scourer. Do not use steel wool, as this will leave residues of steel which will rust. After cleaning, the product should be rinsed free of all cleaning product residue with fresh water.

With proper maintenance, stainless steel will maintain its lustre and appearance indefinitely.

Hardware Warranty

All hardware products supplied by AWS are covered by supplier warranties. The specific details of product warranty vary between ranges. In general, the following warranty considerations apply:

Hardware items are warranted to be free from defects in material and workmanship for a period of six (6) years from the date of purchase.

Various exclusions may apply, including but not limited to:

- Misuse, abuse, accidental or intentional damage, improper or negligent adjustment or operation by the purchaser
- Improper or negligent maintenance or installation
- Inaccurate or incorrect site or operational specifications
- Repair or modification
- Use contrary to the manufacturer's instructions
- Use of replacement parts other than authorised parts
- 'Tea staining' on stainless steel
- Corrosion related damage
- Tarnish or wear on soft finishes

Please speak with your fabricator to request a copy of the appropriate product warranty for the hardware items you choose.
