

ANDO™ | Twin Sliding Door Lock

Twin Point Surface Mounted Sliding Door Lock

Key Features

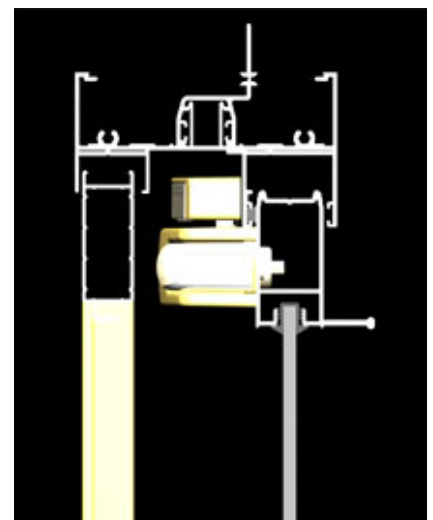

- This powerful square form handle surface mounts to the door.
- The handle incorporates a twin actuated locking mechanism with dual 316-grade stainless steel locking tongues.
- Twin point locking.
- Heavy duty stainless steel tongues.
- Can be colour matched.
- Stainless steel handle option available.

ANDO™ Twin Point lock has twin locking stainless steel tongues that nest into matching adjustable keeper. Covers can be supplied powdercoat or 316 grade stainless steel.

The outer pull on ANDO™ locks is powder coated over stainless steel. This significantly increases the strengths and weather resistance.

When used in the Series 471 Apartment door fitted with flydoors we recommend ANDO™ slimline as it clears the screen door.
