ICON™ | Sliding Door Handle

Sliding Door Handle

Key Features

- This powerful square-form handle offers a firm, comfortable grip and is ideal for larger sliding panels. It is fixed to the door on both the interior and exterior. A mortice lock with hook bolt is fixed separately and is activated by key or interior turn knob in a rectangular base plate.
- Available in 316-grade stainless steel only.

ICON™ Pulls are fitted both sides of the stile. Designed to suit our Designer series, Architectural series and Commercial sliding doors.

We have designed custom injection moulded nylon spacers to position the spring loaded lock keeper in the right location.

ICON™ Pulls with commercial sliding door locks can also be used on our ThermalHEART™ sliding doors.
