

MIRO™ | Hinged Door Lock

Hinged Door Lock

Key Features

- With a sleek, comfortable grip common to all MIRO™ hardware, the lever door lock is available in several locking options, including keyed both sides or with interior snib.
- Used in conjunction with lever compression locking, an upward handle movement activates four-point locking.

MIRO™ lever is more curved than the other types of furniture we offer. The furniture is available in a range of standard and special powder coated colours plus 316 grade stainless steel.

The dummy lock (keeper stile lock) can be operated from inside, turning the handle will retract the shoot bolts top and bottom.

For bi-fold doors we have a matching MIRO™ bi-fold activator.

The image above shows the shoot bolts on non-thermal commercial doors fitted with multi-point locks.

We offer offer three custom furniture sets ICON™, MIRO™ and ANDO™, all three are distinctly different.
