

MARCH HOUSE

📍 EXPLORE THE FEDERATION HOME
WITH A 21ST CENTURY FACELIFT.

Sitting pretty behind a pink crepe myrtle tree is this gorgeous home in Orange, NSW. You'd never imagine that behind the beautiful old façade of March House lies a modern masterpiece.

Winner of Orange City Council's 2019 Heritage Award, March House is a stunning re-imagining of a 1910s Federation-style house.

The clients' brief was to create a light, contemporary home for their growing family. The solution was to extend the back of the old home with a new light-filled addition.

It includes a sleek kitchen, dining and living space that overlook the family's backyard, as well as an internal courtyard that visually links the old and new parts of the home.

A delicious mix of timber joinery and metal, brick and custom black finishes ensures a perfect balance of materials and lines.

Local designers, Source Architects, well-known for their exceptional use of colour palettes, textures and sympathetic designs, were chosen to lead the project.

AWS | PROJECT FEATURE

Knowing the critical importance of correct framing and glazing choices, the team consulted with fabricators, Taberners, to ensure the best choice of windows and doors.

The home now boasts state-of-the-art AWS Double Glazed FrontGLAZE™ frames, Commercial CentreGLAZE™ windows, and expansive Elevate™ SlideMASTER sliding doors – each range purpose-built to welcome natural light and shield the owners from the extremes of temperature for which the town is known.

The result is a home that remains true to its country roots while incorporating a cosmopolitan feel that seamlessly marries with the surrounding neighbourhood.

SERIES 704 SLIDEMASTER™ SLIDING DOOR

- × They're compliant with all Australian Standards, air conditioning requirements, and high wind standards.
- × They boast a very high water resistance of 600Pa, so they can withstand even the harshest Australian climate. You also get optimal weather protection from aluminium sub-sills.
- × Choose from a large variety of sliding door combinations. You might even like to incorporate a stylish 90-degree corner unit by removing the corner post of your room and achieving an unobstructed, 180-degree connection with the outdoors.
- × Doors can be also fitted with internal sliding or roller fly doors.
- × Max panel height: 3300mm
- × Max panel width: 2500mm
- × Max glass thickness: ≤ 24mm

TABERNERS
WINDOWS & DOORS Since 1927

At Taberner's we pride ourselves on supplying high quality, energy efficient aluminium windows and doors as well as a vast range of glazing options and as an Australian Window Association (AWA) member we are bound by rules and regulations that ensure all of our windows and doors meet strict Australian standards. This allows you, the customer, peace of mind that all of our windows and doors will withstand our tough Australian climate. Along with a high commitment to customer service we take real pride in delivering you the best products possible to suit your needs.

2D & 3D CAD Files Available | Download from specifyaws.com.au to use in your projects.
