

FROM VISION TO VICTORY

 WHERE NATURE TAKES OVER

When passersby admire the elegant, fortress-like home at the southern end of Pearl Beach on the NSW Central Coast, they can hardly imagine the monumental hurdles that were overcome to bring it to life. This magnificent home, built by Kane Harrison of Evolving Construction, an industry leader with over 27 years of expertise in high-end custom homes, showcases thought, care, and ingenuity in every detail.

One significant challenge involved a corner stacking door with a unique 90-degree angle

that no-one else was willing to tackle. By collaborating closely with architect Glen and builder Kane, we successfully devised a solution to implement the design.

The home features oversized Series 704 SlideMASTER™ Sliding Doors that extend up to 9 metres and disappear into wall cavities when fully opened, seamlessly integrating the natural environment and the living space. "Birds even fly through the home," notes Kane.

AWS | PROJECT FEATURE

A remarkable application of the Series 704 can be found in the upstairs living room, where wall-to-wall doors offer breathtaking water views. When opened, they invite the refreshing sea breeze to flow through the entire house.

Additionally, the Series 400 Single Glazed CentreGLAZE™ Framing is utilised throughout the home, accommodating various sizes of fixed windows. A standout element is the courtyard, where oversized fixed windows usher in an abundance of natural light that floods the interior spaces.

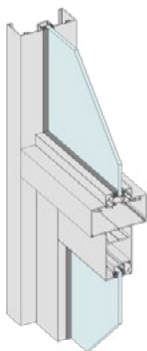

This project has taken out multiple awards including the HIA-CSR Hunter Home of the Year and the HIA National Home of the Year award last year.

Featured Products: Series 400 Single Glazed CentreGLAZE™, Series 462 Architectural Sliding Window, Series 704B SlideMASTER™ Sliding Door

■ SERIES 400 ELEVATE™ CENTREGLAZE™ FRAMING SYSTEM

- × Versatile commercial CentreGLAZE™ framing system ideal for commercial or residential applications.
- × True captive glazing wedge on one side. In elevated installations with bead on the inside at head this allows you to glaze and reglaze from inside the building, no need for scaffolding.
- × Numerous custom designed extrusions to cater for specific applications. A range of sub-sills cover most installations including residential installations into cavity brick and brick veneer walls.
- × Top hung and bottom rolling sliding door track systems.

Maximum Panel Height: Various
Maximum Panel Width: Various
Maximum Glass Thickness: ≤10.38mm
SHGC Range: 0.33-0.63
Uw Range: 4.1-6.0

We offer the entire range of Vantage and Elevate windows and doors– as well as beautiful hardware to match. Whether it's for a residential or commercial application, it doesn't get better than this for form, function, massive spans of glass, great acoustics, energy efficiency and insulation, kid-safe windows and doors, accessibility, and even bushfire-rated options
