

LIVING CHOICE RETIREMENT VILLAGE

PACKERS ALLOW YOU TO RETIRE IN STYLE AT THIS LUXURY RETIREMENT VILLAGE IN SOUTH AUSTRALIA

Retire in style. This retirement lifestyle living village has 141 fully operating apartments, a leisure centre complete with a restaurant, cinema, hairdresser, library, bowling green, outside BBQ area and an indoor pool and spa. Located in leafy Fullarton, South Australia, this oeuvre will make you want to retire. Now.

The client, from Living Choice Australia Retirement Villages, has AWS products in his own home which AWS fabricator Packers completed a few years ago. The client wanted to bring the same quality of product to the retirement village so brought on board AWS products and fabricator, Packers.

Living Choice Australia wanted the building to be Adelaide's finest retirement village. It oozes a sense of comfortable and luxurious living.

AWS products were chosen because they solved a few concerns. The client wanted a sliding door with a non-profiled sill (square flat sill). The Vantage® Series 618 MAGNUM™ sliding door allows for a flush sill. This is imperative when designing for the elderly or disabled as it contributes to ease of access and helps to eliminate trips and falls.

The client also wanted the flyscreens on the sliding doors to slide internally. This feature was desired to ensure the longevity of the flyscreen by protecting them from the weather. This proved another reason why the Vantage® Series 618 MAGNUM™ sliding door was the ideal choice.

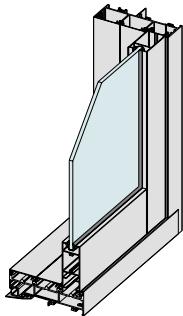

With a request from Packers, AWS went away and redesigned the MAGNUM™ door to get the screens to slide internally and not compromise the performance of the door. At AWS we try to accommodate any situation and hurdle whilst maintaining the performance and efficiency of our products.

Elevate™ Series 400 commercial framing with a flush glazed sash was used so that large panels could allow natural light to shine into the communal living room.

VANTAGE ALUMINIUM JOINERY SERIES 618 MAGNUM™ SLIDING DOOR

- × The Series 618 sliding door designed to complement the MAGNUM™ window systems.
- × The standard sliding door frame is 133mm wide and will snap to the 102mm wide MAGNUM™ window frames without unsightly screws or rivets.
- × The 33mm thick stiles are ideal for extra large sliding doors in high wind load areas. Full height doors (2900mm) remove the need for highlights in most applications. This sliding door achieves very high water resistance.
- × 44mm jambs and head match the standard 44mm flat square sill.
- × Reinforced frame legs are designed to retain the door panels in high wind load areas and help us achieve the high ultimate ratings.
- × 44mm and 50mm high flat sills are ideal for recessing this sliding door into the floor.

Located in Norwood, South Australia, Packers will provide you with technical advice, design expertise and quality workmanship to ensure the highest quality products for your project. A family owned business that have been doing windows and doors for the past 7 years.

2D & 3D CAD Files Available | Download from specifyaws.com.au to use in your projects.
