

LAKE WEYBA

WHERE PRECISION DESIGN
MEETS NATURAL BEAUTY

Sunshine, blue skies, shimmering waters and glorious bushland: Noosaville is a veritable shopping list of natural wonders. And from every corner of this beautiful lakeside home, those wonders can be enjoyed.

Right from the beginning, the owners of the property were determined to create a modern home that embraced the great outdoors. In consultation with Aboda Design Group, Jaicon Constructions and window-and-door manufacturer, Cooloola Glass, the AWS range

of windows and doors was chosen to ensure the home was filled with natural light and seamlessly connected to the surrounding environment.

It wasn't the first time the owner had worked with Cooloola Glass. Past projects had proved extremely successful, no matter the challenge. Given that the design demanded a myriad of door height options and unusual shapes, consulting the fabricator for this project was a no-brainer.

AWS | PROJECT FEATURE

The Elevate™ Series 50 sliding door system was chosen specifically to frame the glorious bushland and lake views – and smooth-operating heavy-duty rollers make it easy to open up to the world outside and take advantage of cool breezes in the height of summer.

To achieve a truly unique finish, individual sills were cut into the concrete to create a clever flush threshold and the corner post was removed, delivering a seamless connection to the outdoors.

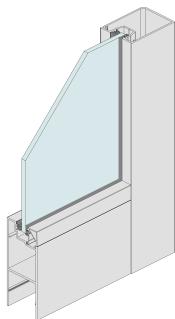

In the kitchen and living areas, beautiful Elevate™ Series 704 sliding door panels were used as large sliding windows to continue the design theme.

A gorgeous granny flat in the backyard also uses the Magnum™ 618 sliding door, not only creating a connection with the environment but mirroring the stunning design of the main home.

Architect: Aboda Design Group. Builder: Jaicon Constructions.

■ SERIES 50 SLIDING COMMERCIAL DOOR

Want a door with superior strength and durability? Look no further! Normally, the industry standard for stiles is 44mm. But this door gives you a massive 50mm-thick stile that outperforms the rest, every time.

× Available as hinged, sliding or pivot style doors to suit your project.

× When configured as sliding panels, heavy-duty bottom rollers or top-hung roller options are available.

× Compatible with Centor screens and most lock types.

Maximum Panel Height: 3000mm
Maximum Panel Width: Various
Maximum Glass Thickness: ≤ 10.38mm

Cooloola Glass is a local family owned business with over 30 years experience providing quality manufactured products at competitive prices for both residential and commercial needs. Cooloola Glass also sell splashbacks, ballustrading, mirrors, security screens and more.
