

COMFORT IN BUNDANOON

SEASONAL BEAUTY, PERFECTED

Nestled amidst the rolling hills of the NSW Southern Highlands, the delightful village of Bundanoon conveys a distinct charm.

Strolling through tree-lined streets, the fresh air and picturesque countryside invigorate your senses. With summer temperatures reaching beyond 35°C and winter dipping to below 0°C, ensuring thermal efficiency in local homes is essential.

The east and north sides of the home feature multiple Series 759 ComfortEDGE™ Sliding Doors, designed to capture the morning and afternoon sun. Their thermal efficiency ensures these rooms remain at a comfortable temperature, minimising the need for air conditioning. On warm summer days, the Series 759 doors can be opened wide, allowing the breeze to flow through the rooms and fill the home.

AWS | PROJECT FEATURE

One bedroom features a large fitted window with Series 755 ComfortEDGE™ Awning Windows either side. The minimally exposed internal aluminium framing enhances thermal performance, maintaining a comfortable temperature all year round. The awning windows can be opened to allow fresh air in whenever desired.

Windows and doors can allow up to 87% of heat in during summer and release up to 40% of heat during winter, making thermal efficiency crucial for this project.

The ComfortEDGE™ range has proven to be the ideal solution for this stunning Southern Highlands home, combining style and sustainability. By maximising sunlight capture and maintaining thermal comfort, this project achieves a perfect blend of aesthetic appeal and energy efficiency in every season.

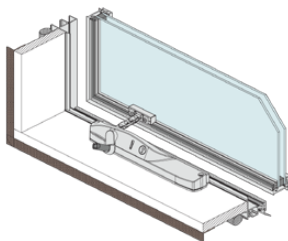

Featured Products: Series 753 ComfortEDGE™ Sliding Window, Series 755 ComfortEDGE™ Awning Window, Series 759 ComfortEDGE™ Sliding Door, Series 549 Hinged Entry Door
